1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the plurality of current collectors in the storage device must be shown or the features canceled from the claims. No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 16, 20-22, 36 and 40 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaun-US 5,736,275. (Kaun) (New Rejection)

Reference is made to Figure 1 of Kaun along with column 4, line 63 through column 5, line 21. It is noted that when there is a slight change in temperature, the outer casing in Kaun will bow, if even to a small degree thus meeting the claimed recitation.

4. Claims 1, 2, 21 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by either Aldecoa-US 5,374,490 (Aldecoa) or LaFollette-US 5,556,627 (LaFollette). (New Rejection)

See Figure 2 of Aldecoa along with column 3, lines 14-17 of the same and column 4, lines 20-62.

Reference is made to Figure 3 and 4 of LaFollette and to column 10, line 59 through column 12, line 10.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 17 and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kaun.
(New Rejection)

The only claimed feature not shown by the patent to Kaun is the outer casing being formed of stainless steel. This is a notoriously well known material for a container and in particular a battery container because of its inexpensive cost and durability. To have utilized stainless steel for the casing in Kaun would have been obvious to one of ordinary skill in this art at the time the invention was made for the above use of the noted properties.

8. The following is an examiner's statement of reasons for allowance: none of the prior art show the claimed battery with the dual bipolar current collectors with the external electrical casing wherein the casing is formed of either one shell or of two shells, where the shell(s) overlap one another and are joined together.
